What must you do to activate the new default value for numeric full redaction? **A.** Re-enable redaction policies that use FULL data redaction. **B.** Re-create redaction policies that use FULL data redaction. **C.** Re-connect the sessions that access objects with redaction policies defined on them. **D.** Restart the database instance. **E.** Flush the shared pool. **Answer: D** Explanation: About Altering the Default Full Data Redaction Value You can alter the default displayed values for full Data Redaction policies. By default, 0 is the redacted value when Oracle Database performs full redaction (DBMS\_REDACT.FULL) on a column of the NUMBER data type. If you want to change it to another value (for example, 7), then you can run the DBMS\_REDACT.UPDATE\_FULL\_REDACTION\_VALUES procedure to modify this value. The modification applies to all of the Data Redaction policies in the current database instance. After you modify a value, you must restart the database for it to take effect. Note: \* The DBMS\_REDACT package provides an interface to Oracle Data Redaction, which enables you to mask (redact) data that is returned from queries issued by low-privileged users or an application. \* UPDATE\_FULL\_REDACTION\_VALUES Procedure This procedure modifies the default displayed values for a Data Redaction policy for full redaction. \* After you create the Data Redaction policy, it is automatically enabled and ready to redact data. \* Oracle Data Redaction enables you to mask (redact) data that is returned from queries issued by low-privileged users or applications. You can redact column data by using one of the following methods: / Full redaction. / Partial redaction. / Regular expressions. / Random redaction. / No redaction. References:
