We have online and offline service, and if you have any questions for NSE5\_FMG-7.2 training materials, you can consult us, and we will give you reply as soon as we can.

If you do not immediately receive [H19-301\\_V3.0 Latest Test Materials](#) a link from us, you can send us an email to urge us.

**NEW QUESTION: 1**Which three statements are true about Automatic Degree of Parallelism (Auto DOP) on Exadata?**A.** Oracle's Auto DOP algorithms calculate the Degree of Parallelism based on the table's block counts.**B.** Auto DOP is disabled by default and must be enabled before SQL statements can take advantage of its features.**C.** Auto DOP is an exclusive feature in Exadata, which allows the database optimizer to evaluate each statement and run it in parallel without special hints.**D.** Auto DOP is enabled by default on Oracle 11gR2, allowing full use of its features.**E.** SQL statements that take advantage of Auto DOP can be identified by using data from Oracle Automatic Workload Repository (AWR) or Enterprise Manager's Monitored SQL Executions page.**Answer: A,B,E****Explanation:**Explanation/Reference:Explanation:B (not c): To enable the features in 11g Release 2, use the parallel\_degree\_policy parameter (by default this stuff is off - parameter is set to manual). For Auto DOP, setting this to limited is sufficient. If you want more functionality (in-memory parallel processing and parallel statement queuing parallel\_degree\_policy should be set to auto).**Incorrect:**Not A:\* What if you don't have Exadata? Chances are that if your system is large enough to warrant Auto DOP, it is similar enough to Exadata to behave nicely with this number.\*Auto DOP is only useful in systems with enough CPUs and disks to make concurrent parallel processing feasible. It was designed mostly for Exadata, or for systems of similar size. 48 CPUs and 84 disks sound like a nice start

**NEW QUESTION: 2**Can you change the column text of primary and secondary rates on the Benefit self-service page?**A.** Yes, a change option is available in the Enrollment Configuration task.**B.** No, a change option is available in the Configure Grouping Display task, but it doesn't allow a text change.**C.** Yes, a change option is available in the Configure Grouping Display task.**D.** No, a change option is not available in the Configure Grouping Display task.**Answer: C**

**NEW QUESTION: 3**When mean imputation is performed on data after the data is partitioned for honest assessment, what is the most appropriate method for handling the mean imputation?**A.** The sample means from each partition of the data are applied to their own partition.**B.** The sample means from the test data set are applied to the training and validation data sets.**C.** The sample means from the validation data set are applied to the training and test data sets.**D.** The sample means from the training data set are applied to the validation and test data sets.**Answer: D**

**NEW QUESTION: 4**Calculate the weighted average cost of capital (WACC) for a firm with the following capital structure:10% Preferred stock50% Common equity40% DebtTax rate 40% Before tax cost of debt 12%The cost of common equity is 15%Cost of preferred stock 10%**A.**

7.98%B. 7.2%C. 13.3%D. 11.38%E. 12.33%**Answer: D**Explanation:Explanation/Reference:  
Explanation:A firm's weighted average cost of capital (WACC) = the cost of each component of capital weighted by the proportion of that component in the firm's capital structure. In this case WACC = (after tax cost of debt x40%) + (cost of common equity x 50%) + (cost of preferred stock x 10%) = (12% x 60% x 40%) + (15% x50%) + (10% x 10%) = 2.88% + 7.5% + 1% = 11.38%.
