Besides, the update rate of SAP C-TS462-2022 related training vce is very regular.

NEW QUESTION: 1 Refer to the exhibit. When running EIGRP, what is required for Router A to exchange routing updates with Router C? **A.** Loopback interfaces must be configured so a DR is elected **B.** Router B needs to have two network statements, one for each connected network **C.** The no auto-summary command is needed on Router A and Router C **D.** AS numbers must be changed to match on all the routers **Answer: D** Explanation: Here we required same autonomous system between router A, B, C. Routing updated always exchange between insame EIGRP EIGRP autonomous system. you can configure more than one EIGRP autonomous system on the same router. This is typically done at a redistribution point where two EIGRP autonomous systems are interconnected. Individual router interfaces should only be included within a single EIGRP autonomous system. Cisco does not recommend running multiple EIGRP autonomous systems on the same set of interfaces on the router. If multiple EIGRP autonomous systems are used with multiple points of mutual redistribution, it can cause discrepancies in the EIGRP topology table if correct filtering is not performed at the redistribution points. If possible, Cisco recommends you configure only one EIGRP autonomous system in any single autonomous system.
