NEW QUESTION: 1 Azure Resource ManagerでRG1という名前のリソースグループを作成します。RG1のリソースが削除されないようにする必要があります。

どの設定を使うべきですか？回答するには、回答領域で適切な設定を選択します。**Answer:**

Explanation: Explanation: You can configure a lock on a resource group to prevent the accidental deletion. As an administrator, you may need to lock a subscription, resource group, or resource to prevent other users in your organization from accidentally deleting or modifying critical resources. You can set the lock level to CanNotDelete or ReadOnly. In the portal, the locks are called Delete and Read-only respectively. * CanNotDelete means authorized users can still read and modify a resource, but they can't delete the resource. * ReadOnly means authorized users can read a resource, but they can't delete or update the resource. Applying this lock is similar to restricting all authorized users to the permissions granted by the Reader role. Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/resource-group-lock-resources>

NEW QUESTION: 2 When creating a Manual Pool, what is required to use PCoIP with a desktop
