Demos, freely, Your potential [SAFE Release Train Engineer](#) will be fully realized after you have passed the exam.

NEW QUESTION: 1The drive-through service at a fast-food restaurant consists of driving up to place an order, advancing to a window to pay for the order, and then advancing to another window to receive the items ordered. This type of waiting-line system is:**A.** Multiple channel multiple phase**B.** Single channel, multiple phase**C.** Multiple channel single phase**D.** Single channel, single phase**Answer: B****Explanation:**The drive-through represents a single queue (channel). Because this waiting line has three services in series, it may be said to be multiple phase. Another example is the typical factory assembly line. This terminology (channel, phase), however, is not used by all writers on queuing theory.

NEW QUESTION: 2The implementation group has been using the test bed to do an IPv6 'proof-of-concept'. After several changes to the network addressing and routing schemes, a trouble ticket has been opened indicating that the loopback address on R1 (2026::111:1) is not able to ping the loopback address on DSW2 (2026::102:1). Use the supported commands to isolate the cause of this fault and answer the following question. What is the solution to the fault condition?**A.** Under the interface Serial0/0/0.12 configuration enter the ipv6 ospf 6 area 12 command.**B.** Under the interface Serial0/0/0.23 configuration enter the ipv6 ospf 6 area 0 command.**C.** Under ipv6 router ospf 6 configuration enter the no passive-interface default command.**D.** Under ipv6 router ospf 6 configuration enter the network 2026::1:/122 area 0 command.**Answer: B****Explanation:**As explained in question one of this ticket, we can then see that OSPFv3 has not been enabled on the interface to R3: So the problem is with R2, related to IPV6 Routing, and the fix is to enable the "ipv6 ospf 6 area 0" command under the serial 0/0/0.23 interface. We need to enable this interface for area 0 according to the topology diagram.

NEW QUESTION: 3新しいデータベース配置を作成しています。デフォルトで作成される接続について正しい記述はどれですか？**A.** 他のデータベース展開または外部サーバーへのデフォルト接続は作成されません。**B.** すべてのネットワーク接続は、データベース展開内で事前に作成されています。**C.** デフォルトのネットワーク接続がアプリケーションサーバーに作成されます。**D.** 作成した他のデータベース展開へのデフォルトのネットワーク接続が作成されます。**Answer: A**
