NEW QUESTION: 1A. Option BB. Option AC. Option DD. Option C**Answer: A****Explanation:** This question tests the operating principles of the Layer 2 switch. Check the MAC address table of Switch1 and find that the MAC address of the host does not exist in the table. Switch1 will flood the data out all of its ports except the port from which the data originated to determine which port the host is located in. Switches work as follows:- Switches learn the MAC addresses of PCs or workstations that are connected to their switch ports by examining the source address of frames that are received on that port.- Machines may have been removed from a port, turned off, or moved to another port on the same switch or a different switch.- This could cause confusion in frame forwarding.- The MAC address entry is automatically discarded or aged out after 300 seconds- If there is not MAC address of destination host in MAC table, switch sends broadcast to all ports except the source to find out the destination host. In output there is no MAC address of give host so switch floods to all ports except the source port.

NEW QUESTION: 2 Which of the following process steps is automatically generated in SAP Ariba Buying and Invoicing Integration? one **A. Create Invoice B. Confirm Good Delivery C. Create Purchase Order D. Check Invoice****Answer: C**

NEW QUESTION: 3 From the list below, which one is the major benefit of AMP Threat GRID? **A.**

AMP Threat Grid analyzes suspicious behavior in your network against exactly 400 behavioral indicators
B. AMP Threat Grid learns ONLY from data you pass on your network and not from anything else to monitor for suspicious behavior. This makes the system much faster and efficient
C. AMP Threat Grid collects file information from customer servers and run tests on them to see if they are infected with viruses
D. AMP Threat Grid combines Static, and Dynamic Malware analysis with threat intelligence into one combined solution
Answer: D

NEW QUESTION: 4 DRAG DROP You have a Lync Server 2013 infrastructure. You have a Virtual Desktop Infrastructure (VDI) that uses Hyper-V. You use VDI templates based on Windows 7 Service Pack 1 (SP1). All thin clients run Windows 7 SP1. Each thin client has a Lync-certified headset. You need to prepare all of the thin clients and all of the VDI templates so that users can place calls by using the headset. Which components should you install on the thin clients and the VDI templates? To answer, drag the appropriate components to the correct location in the answer area. Each component may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.
