Suitability for different individuals, We are proud of our Lead-Cybersecurity-Manager braindumps pdf with high pass rate and good reputation, The characteristic that three versions of Lead-Cybersecurity-Manager exam torrent all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our Lead-Cybersecurity-Manager quiz guide.

**NEW QUESTION: 1** Which two are advantages of using Oracle Configuration and Compliance Cloud Service? (Choose two.) **A.** It scores the benchmark assessment and attaches SLAs to rule-sets, and also uses the STIG. **B.** It scores only for benchmark assessments without attaching SLA to the rule-sets. **C.** It provides insights with highest severity and frequency to prioritize remediation. **D.** It only uses Security Technical Implementation Guides (STIGs) for out-of-the-box automation for 100% compliance of finance systems. **Answer: A, B**

**NEW QUESTION: 2** An administrator is configuring a vSphere HA cluster for three ESXi hosts and their resident virtual machines. The cluster will be configured to support a single host failure. Resource reservations must be enforced during a failover event. Assuming default settings, how does HA determine the current failover capacity? **A.** Calculating the largest possible CPU and Memory guarantee for any virtual machine in the cluster, then calculating how many virtual machines of that size can be started on the largest host and reserving space in the cluster accordingly. **B.** Calculating the largest possible CPU and Memory guarantee for any running virtual machine in the cluster, then calculating how many virtual machines of that size can be started on the largest host and reserving space in the cluster accordingly. **C.** Averaging the largest possible CPU and Memory guarantee for any virtual machine in the cluster, then calculating how many virtual machines of that size can be started on the largest host and reserving space in the cluster accordingly. **D.** Averaging the largest possible CPU and Memory guarantee for any running virtual machine in the cluster, then calculating how many virtual machines of that size can be started on the largest host and reserving space in the cluster accordingly. **Answer: B**

**NEW QUESTION: 3** DRAG DROP Order the steps required to perform a complete integrity check of a journaled file system. **Answer:** Explanation:

**NEW QUESTION: 4** A successful information security management program should use which of the following to determine the amount of resources devoted to mitigating exposures? **A.** Audit report findings **B.** Amount of IT budget available **C.** Risk analysis results **D.** Penetration test results **Answer: C** Explanation: Explanation/Reference: Explanation: Risk analysis results are the most useful and complete source of information for determining the amount of resources to devote to mitigating exposures. Audit report findings may not address all risks and do not

address annual loss frequency. Penetration test results provide only a limited view of exposures, while the IT budget is not tied to the exposures faced by the organization.
