NEW QUESTION: 4

管理プレーンは、クラウド環境を管理し、さまざまなシステムにわたって管理タスクを実行するために使用されますが、最も具体的には、ハイパーバイザーと共に使用されます。

管理プレーンは通常、このオーケストレーションに何を利用しますか? **A.** XML **B.** スクリプト **C.** TLS **D.** API **Answer: D** Explanation: The management plane uses APIs to execute remote calls across the cloud environment to various management systems, especially hypervisors. This allows a centralized administrative interface, often a web portal, to orchestrate tasks throughout an enterprise. Scripts may be utilized to execute API calls, but they are not used directly to interact

with systems. XML is used for data encoding and transmission, but not for executing remote calls. TLS is used to encrypt communications and may be used with API calls, but it is not the actual process for executing commands.
