NEW QUESTION: 2You are developing an ASP.NET MVC application that uses forms authentication against an Oracle database.You need to authenticate the users.Which code segment should you use?**A.** Option **BB.** Option **DC.** Option **AD.** Option **C****Answer: B****Explanation:** When implementing a custom membership provider, you are required to inherit the MembershipProvider abstract class.There are two primary reasons for creating a custom membership provider.You need to store membership information in a data source that is not

supported by the membership providers included with the .NET Framework, such as a FoxPro database, an Oracle database, or other data source. You need to manage membership information using a database schema that is different from the database schema used by the providers that ship with the .NET Framework. A common example of this would be membership data that already exists in a SQL Server database for a company or Web site.
