Reference: <http://aws.amazon.com/cloudwatch/pricing/>

NEW QUESTION: 3 **A.** Option A **B.** Option F **C.** Option E **D.** Option D **E.** Option B **F.** Option C
Answer: B,C,F
Explanation: Explanation: C: From question: " The server name for the database must be set by using a parameter named ParamConnection when any package in the project is executed." E: SSIS 2012 has introduced the concept of Project level connection managers. An SSIS project is generally more than one package. To simplify lives, the SSIS team now allows for the sharing of common resources across projects, connection managers being one of those resources. F: When a parameter is marked as required, a server value or execution value must be specified for that parameter. Otherwise, the corresponding package does not execute. Although the parameter has a default value at design time, it will never be used once the project is deployed. Note: * Integration Services (SSIS) parameters allow you to assign values to properties within packages at the time of package execution. You can create project parameters at the project level and package parameters at the package level. Project parameters are used to supply any external input the project receives to one or more packages in the project. Package parameters allow you to modify package execution without having to edit and redeploy the package. Reference: Integration Services (SSIS) Parameters

NEW QUESTION: 4 Sie erstellen einen täglichen Bericht gemäß der folgenden Abfrage: Sie müssen die Leistung der Abfrage verbessern. Was tun?**A.** Option A **B.** Option C **C.** Option D **D.** Option B
