Our company devoted ourselves to providing high-quality Data Center, Associate (JNCIA-DC) practice materials to our customers since ten years ago, Try Our Juniper JN0-281 Latest Exam Questions & Answers.

Latest JN0-281 Accurate Answers Offer You The Best New Test Voucher | Data Center, Associate (JNCIA-DC)

We are professional and authoritative exam dumps seller in this field, Simulates exam environment, So we can guarantee that our JN0-281 study guide is a first class reviewing

material for the actual test.

With the development of society, more and more people have realized the **JN0-281 Accurate Answers** importance of skills, In other words, with this certification, you can flesh your muscles in the big companies to your hearts' content.

Is not that amazing, So it is hard for candidates to select, There are some updated **JN0-281 Accurate Answers** questions, but if you studied you will pass, Unfortunately, in case of failure, you can require for changing another exam dumps for free, or ask for refund.

NEW QUESTION: 1Your network contains two DHCP servers named Server1 and Server2. Server1 fails.You discover that DHCP clients can no longer receive IP address leases.You need to ensure that the DHCP clients receive IP addresses immediately.What should you configure from the View/Edit Failover Relationship settings? To answer, select the appropriate setting in the answer area.**Answer:** Explanation:ExplanationA manual failover will have to occur by clicking on the Change to partner down button (the partner has to actually be unavailable to click this button).Note: You can manually change the state of a server which is running in communication interrupted to partner down using DHCP MMC or DHCP PowerShell.In MMC, go to IPv4->Properties, go to Failover tab, select the specific failover relationship and click edit. You will see "Change to partner down" button on the edit page. This button is enabled when the server is running in communication interrupted state.Reference: DHCP Failover Hot-Standby Mode
<http://blogs.technet.com/b/teamdhcp/archive/2012/09/03/dhcp-failover-hot-standby-mode.a.spx>

NEW QUESTION: 2A. Option EB. Option DC. Option BD. Option AE. Option CAnswer: C,E

NEW QUESTION: 3Note This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.Start of Repeated Scenario:Your network contains an Active Directory domain named contoso.com The functional level of the forest and the domain is Windows Server 2008 R2 All servers in the domain run Windows Server 2016 Standard. The domain contains 300 client computers that run either Windows 8.1 or Windows 10.The domain contains nine servers that are configured as shown in the following table.The virtual machines are configured as follows:* Each virtual machine has one virtual network adapter* VM1 and VM2 are part of a Network Load Balancing (NLB) cluster.* All of the servers on the network can communicate with all of the virtual machines.End of repeated Scenario.You need to minimize the likelihood that a virtual machine running malicious code will consume excessive resources on Server5.What should you do?**A. Configure the virtual machines as shielded virtual machines. B. Run the Set-VMProcessor cmdlet and specify the -EnableHostResourceProtection Parameter. C. Run the Set-VMProcessor cmdlet and specify the -MaximumCountPerNumaNode Parameter. D. Configure VM Network Adapter Isolation.Answer: B**

NEW QUESTION: 4Gibson purchased stock with a fair market value of \$14,000 from Gibson's adult child for \$12,000. The child's cost basis in the stock at the date of sale was \$16,000. Gibson sold the same stock to an unrelated party for \$18,000. What is Gibson's recognized gain from the sale?**A. \$6,000B. \$2,000C. \$4,000D. \$0Answer: B**Explanation:ExplanationChoice "b" is correct. Losses are disallowed on most related party sales transactions even if they were made at an arm's length (FMV) price. The basis (and related gain or loss) of the (second) buying relative depends on whether the second relative's resale price is higher, lower, or between the first relative's basis and the lower selling price to the second relative. In this case, the \$4,000 capital loss on the sale by Gibson's adult child to Gibson [\$12,000 SP - \$16,000 Basis] is

disallowed. Gibson's basis is determined by his selling price to a third party. In this case, the selling price is \$18,000, which is HIGHER than the original basis of Gibson's adult child. Gibson's basis in the stock is, therefore, his adult child's basis of \$16,000. Gibson's recognized basis is calculated as follows: Choice "a" is incorrect. There would be a zero gain or loss if the selling price were between the adult child's basis and Gibson's purchase price, but this is not the case in the facts. Choice "c" is incorrect. This answer option uses the fair market value of the stock at the date of purchase as the basis. As is discussed above, the rules do not provide for this treatment. [$\$18,000 \text{ SP} - \$14,000 \text{ FMV} = \$4,000$] Choice "d" is incorrect. This would be the answer if the basis were Gibson's purchase price of \$12,000; however, because the stock sold for more than Gibson's child's basis and the child had a disallowed loss on the sale to Gibson, Gibson is allowed to use his child's original basis of \$16,000 as his basis for the stock on the date of the second sale. [$\$18,000 \text{ SP} - \$12,000 \text{ PP} = \$6,000$]
