NEW QUESTION: 1 Which of the following can be registered as entry points with a SoapServer instance (choose 2):
A. All methods from a class
B. All classes defined in a script
C. A single method from a class
D. A single function
Answer: A,D

NEW QUESTION: 2 **A.** Option C
B. Option B
C. Option A
D. Option D
Answer: C
Explanation: The AWS snapshot is a point in time backup of an EBS volume. When the snapshot command is executed it will capture the current state of the data that is written on the drive and take a backup. For a better and consistent snapshot of the root EBS volume, AWS recommends stopping the instance. For additional volumes it is recommended to unmount the device. The snapshots are asynchronous and incremental.

NEW QUESTION: 3 The HR Administrator/Line Manager has entered the details of a potential hire. However, the application indicates the existence of a duplicate person record. Which three actions can the HR Administrator/Line Manager take?
A. modify the existing work relationship to reflect the new one
B. no action (Employee Work Relation Exists)
C. delete the duplicate record
D. create a new work relationship
E. rehire the employee
F. append the last name with the number of duplicate records found
Answer: A,C,E
Explanation: Note: Real-time duplicate prevention finds use in data quality service consuming applications such as Oracle Fusion Receivables and Oracle Fusion Customer Center. When users try to enter a new person, organization, or location record through their UI into the Oracle Fusion trading community registry, the service finds all possible duplicate records that may exist in the registry for an entered record, and assigns a match score to each potential duplicate identified. Based on the match score returned by the service and the threshold settings in the configuration, the calling application can provide the option to either select an existing duplicate record or continue to create a new record.
