We can tell you with confidence that the Lead-Cybersecurity-Manager study materials are superior in all respects to similar products.

NEW QUESTION: 1You have an on-premises Exchange organization. The organization plans to migrate to Exchange Online. Users report that after their mailboxes are migrated to Exchange Online they are no longer able to send email to a specific dynamic distribution list. All other distribution lists work as expected. You need to resolve the issue. What should you do?
A. Run the following Windows PowerShell cmdlet: Set-DynamicDistributionGroup
B. In the Active Directory Synchronization Services console, change the connector filter to include dynamic distribution lists.
C. In Office 365, re-create the dynamic distribution list.
D. Reduce the number of members in the distribution list to fewer than 1,500 contacts.
Answer: C
Explanation:
Explanation/Reference: Explanation: PROBLEM You have a hybrid deployment of Exchange Online in Office 365 and on-premises Exchange Server. In this environment, certain members of a dynamic distribution group do not receive email messages. CAUSE This problem occurs if the dynamic distribution group was set up before the environment became a hybrid deployment and if the dynamic distribution group uses filters to include only mailboxes. Mailboxes that are migrated to Office 365 become mail-enabled users in the on-premises directory. SOLUTION Use

the Set-DynamicDistributionGroup cmdlet to update the filters for the dynamic distribution group to include mail-enabled users.References:
