NEW QUESTION: 1When configuring LLQ (strict priority queue) on a traffic class using the Cisco IOS XR priority command on a Cisco ASR9K router, which additional QoS command is required for this traffic class?**A.** bandwidth**B.** shape**C.** police**D.** random-detect**Answer: C****Explanation:** ExplanationThe Low Latency Queueing feature brings strict priority queueing to Class-Based Weighted Fair Queueing (CBWFQ).

NEW QUESTION: 2The systems administrator did not immediately notify the security officer about a malicious attack. An information security manager could prevent this situation by:**A.** regularly testing the intrusion detection system (IDS).**B.** establishing mandatory training of all personnel.**C.** periodically testing the incident response plans.**D.** periodically reviewing incident response procedures.**Answer: C****Explanation:**Security incident response plans should be tested to find any deficiencies and improve existing processes. Testing the intrusion detection system (IDS) is a good practice but would not have prevented this situation. All personnel need to go through formal training to ensure that they understand the process, tools and methodology involved in handling security incidents. However, testing of the actual plans is more effective in ensuring the process works as intended. Reviewing the response procedures is not enough; the security response plan needs to be tested on a regular basis.

NEW QUESTION: 3Which three tasks can a user with the ext-lan-policy privileges perform?
