For instance, you can closely concentrate your mind and learn more effectively.

NEW QUESTION: 1You have configured persistent NAT in your NAT rule base. You create a security policy in the direction of external to internal.Which persistent NAT parameter should you configure?**A. target-hostB. any-remote-hostC. all-remote-hostD. target-host-portAnswer: A,B****Explanation:**The following types of persistent NAT can be configured on the Juniper Networks device:
* Any remote host-All requests from a specific internal IP address and port are mapped to the same reflexive transport address. Any external host can send a packet to the internal host by sending the packet to the reflexive transport address.
* Target host-All requests from a specific internal IP address and port are mapped to the same reflexive transport address. An external host can send a packet to an internal host by sending the packet to the reflexive transport address. The internal host must have previously sent a packet to the external host's IP address.
