In addition to ensuring that you are provided with only the best [C-BRU2C-2020 Latest Test Questions](#) and most updated CREST CREST Practitioner training materials, we also want you to be able to access them easily, whenever you want.

NEW QUESTION: 1Your network contains an Active Directory forest named contoso.com. The forest is managed by using Microsoft System Center 2012. You plan to create virtual machine templates to deploy servers by using the Virtual Machine Manager Self-service Portal (VMMSSP). To the Virtual Machine Manager (VMM) library, you add a VHD that has a generalized image of Windows Server 2012. You need to identify which VMM components must be associated with the image. Which components should you identify? (Each correct answer presents part of the solution. Choose all that apply.)
A. A capability profile
B. A hardware profile
C. A host profile
D. A guest OS profile
Answer: B, D
Explanation: Profiles VMM provides the following profiles:
* (A) Guest operating system profile-A guest operating system profile defines operating system configured settings which will be applied to a virtual machine created from the template. It defines common operating system settings such as the type of operating system, the computer name, administrator password, domain name, product key, and time zone, answer file and run once file.
* (B) Hardware profile-A hardware profile defines hardware configuration settings such as CPU, memory, network adapters, a video adapter, a DVD drive, a floppy drive, COM ports, and the priority given the virtual machine when allocating resources on a virtual machine host.
Incorrect: Not D: VMM also includes host profiles. Host profiles are not used for virtual machine creation. They are used during the conversion of a bare-metal computer to a Hyper-V host.
Reference: Creating Profiles and Templates in VMM Overview
