We are always vigilant to such variations and duly update your matter.

**NEW QUESTION: 1** Which of the following can an administrator create while building a metrics extract?  
**A.** Strategies **B.** Scorecards **C.** Diagrams **D.** Projects **Answer: B**

**NEW QUESTION: 2** Which of the following is NOT an example of Self-Help capabilities?  
**A.** Web front-end **B.** Requirement to always call the service desk for service requests **C.** A direct interface into the back end process handling software **D.** Menu-driven range of self help and service requests **Answer: B**

**NEW QUESTION: 3** An administrator account is granted the CREATE SESSION and SET CONTAINER system privileges. A multitenant container database (CDB) instant has the following parameter set: `THREADED_EXECUTION = FALSE` Which four statements are true about this administrator establishing connections to root in a CDB that has been opened in read only mode?  
**A.** You can connect as a local user by using the connect statement. **B.** You can connect by using OS authentication. **C.** You can connect as a local user by using the SET CONTAINER statement. **D.** You can connect as a common user by using the connect statement. **E.** You can connect by using a Net Service name. **F.** You can connect by using easy connect. **Answer: B,C,E,F**  
Explanation: \* The choice of threading model is dictated by the `THREADED_EXECUTION` initialization parameter. `THREADED_EXECUTION=FALSE` : The default value causes Oracle to run using the multiprocess model. `THREADED_EXECUTION=TRUE` : Oracle runs with the

multithreaded model.\* OS Authentication is not supported with the multithreaded model.\*  
THREADED\_EXECUTIONWhen this initialization parameter is set to TRUE, which enables the multithreaded Oracle model, operating system authentication is not supported. Attempts to connect to the database using operating system authentication (forexample, CONNECT / AS SYSDBA or CONNECT / ) when this initialization parameter is set to TRUE receive an ORA-01031"insufficient privileges" error.F: The new SET CONTAINER statement within a call back function:The advantage of SET CONTAINER is that the pool does not have to create a new connection to a PDB, if there is an existing connection to a different PDB. The pool can use the existing connection, and through SET CONTAINER, can connect to the desired PDB. This can be done using:ALTER SESSION SET CONTAINER=<PDB Name>This avoids the need to create a new connection from scratch.

**NEW QUESTION: 4**You are a district manager for a large retail company. You want to provide sales managers with deeper sales insights to ensure that they can make more informed decisions for their stores.Store managers must be able to view data in near real-time.You need to create and share a Power BI dashboard that can be used by the store managers.Which tools can you use? To answer, drag the appropriate reporting types to the correct requirements. Each reporting type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:
