**NEW QUESTION: 1**You have an Azure Stack integrated system that has 100 tenants.You create a new offer that is Private.You need to provide the offer to a tenant.What should you do?**A.** Delegate rights to the tenant user, and then instruct the tenant user to create a new subscription.**B.** Run the New-AzsOffer cmdlet, and then specify the tenant user account.**C.** Run the Set-AzsUserSubscription cmdlet, and then specify the subscription of the tenant user.**D.** Create a new subscription, and then assign the subscription to the tenant.**Answer: D**  
Explanation:When you create an offer, you must include at least one base plan, but you can also create add- on plans that users can add to their subscription. A subscription is how users access your offers.After you create an offer, users need a subscription to that offer before they can use it. You can create subscriptions for both public and private offers. If do not want your tenants to create their own subscriptions, make all of your offers private, and then create subscriptions on behalf of your tenants. This approach is common when integrating Azure Stack with external billing or service catalog systems.After you create a subscription for a user, that user can log into the user portal and will find that they are subscribed to the offer.Incorrect Answers:A: As the Azure Stack operator, you can delegate the creation of offers and users to other users by using the delegation functionality.C: The New-AzsOffer cmdlet creates an offer composing of the specified base plans and add-on plans.D: The Set-AzsSubscription cmdlet modifies the current logged-in user's tenant subscription.References:

**NEW QUESTION: 3****A.** GET**B.** PUT**C.** DELETED**D.** POST**Answer: B**

**NEW QUESTION: 4**Characterizing an existing network requires gathering as much information about the network as possible.Which of these choices describes the preferred order for the

information-gathering process?**A.** Traffic analysis, existing documentation and organizational input, site and network audits**B.** Existing documentation and organizational input, site and network audits, traffic analysis**C.** Site and network audits, traffic analysis, existing documentation and organizational input**D.** Site and network audits, existing documentation and organizational input, traffic analysis**Answer: B**  
**Explanation:**Explanation/Reference:  
Explanation:This section describes the steps necessary to characterize the existing network infrastructure and all sites.This process requires three steps:Step 1. Gather existing documentation about the network, and query the organization to discover additional information. Organization input, a network audit, and traffic analysis provide the key information you need.(Note that existing documentation may be inaccurate.) Step 2. Perform a network audit that adds detail to the description of the network. If possible, use traffic-analysis information to augment organizational input when you are describing the applications and protocols used in the network.Step 3. Based on your network characterization, write a summary report that describes the health of the network. With this information, you can propose hardware and software upgrades to support the network requirements and the organizational requirements.
