**NEW QUESTION: 1** Which of the following is the MOST robust method for disposing of magnetic media that contains confidential information?  
**A.** Degaussing **B.** Erasing **C.** Defragmenting **D.** Destroying  
**Answer: D**  
**Explanation:** Destroying magnetic media is the only way to assure that confidential information cannot be recovered. Degaussing or demagnetizing is not sufficient to fully erase information from magnetic media. The purpose of defragmentation is to eliminate fragmentation in file systems and does not remove information. Erasing or deleting magnetic media does not remove the information; this method simply changes a file's indexing information.
