NEW QUESTION: 1What is a function of a conferencing solution?**A.** To schedule calls.**B.** To provide an audio and video interface for the user.**C.** To join 3 or more participants in a meeting.**D.** To act as a traffic cop for network communication.**Answer: C**

NEW QUESTION: 2Note: This question is part of a series of questions that present the same scenario.Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have a Microsoft SQL server that has Data Quality Services (DQS) installed. You need to review the completeness and the uniqueness of the data stored in the matching policy.Solution: You modify the weight of the domain in the matching rule.Does this meet the goal?**A.** Yes**B.** No
Answer: AExplanation:Use a matching rule, and use completeness and uniqueness data to determine what weight to give a field in the matching process.If there is a high level of uniqueness in a field, using the field in a matching policy can decrease the matching results, so you may want to set the weight for that field to a relatively small value. If you have a low level of uniqueness for a column, but low completeness, you may not want to include a domain for that column.References:
