So get your exam questions today and pass your HP HPE0-G01 certification exam successfully,

And we have confidence to guarantee that you will not regret to buy our HPE0-G01 exam simulation software, because you feel it's reliability after you have used it; you can also get more confident in HPE0-G01 exam.

If you choose our HPE0-G01 practice engine, you are going to get the certification easily, So these HPE0-G01 latest dumps will be a turning point in your life.

You can just feel rest assured that our after sale service staffs are always here waiting for offering you our services on our HPE0-G01 exam questions, For example, in order to meet the needs of different groups of people, we provide customers with three different versions of HPE0-G01 study materials, which contain the same questions and answers.

So that you can grasp the HPE0-G01 exam key points in the least time and get improvement with right direction, Test Engines are made available for downloading solely for use by end users according to the terms of the License Agreement.

So choosing our HP HPE0-G01 study materials you will take more than you have imagined, You may get HPE0-G01 exam dumps from different web sites or books, but logic is the key.

**NEW QUESTION: 1**Your network contains an Active Directory forest. The forest contains two domains named contoso.com and fabrikam.com. The functional level of the forest is Windows Server 2003. The contoso.com domain contains domain controllers that run either Windows Server 2008 or Windows Server 2008 R2. The functional level of the domain is Windows Server 2008. The fabrikam.com domain contains domain controllers that run either Windows Server 2003 or Windows Server 2008. The functional level of the domain is Windows Server 2003. The contoso.com domain contains a member server named Server1 that runs Windows Server 2012 R2. You install the Active Directory Domain Services server role on Server1. You need to add Server1 as a new domain controller in the contoso.com domain. What should you do?  
**A.** Modify the Computer Name/Domain Changes properties.  
**B.** Raise the functional level of the forest, and then run dcpromo.exe.  
**C.** Run the Active Directory Domain Services Configuration Wizard.  
**D.** Run adprep.exe /domainprep, and then run dcpromo.exe.  
**Answer: C**  
**Explanation:** Windows Server 2012 R2 requires a Windows Server 2003 forest functional level. That is, before you can add a domain controller that runs Windows Server 2012 R2 to an existing Active Directory forest, the forest functional level must be Windows Server 2003 or higher.

**NEW QUESTION: 2**A new Indexing Administrator role has been added to Roles Based Administration to allow more granular management of indexing. Which two options are unavailable to the Indexing Administrator role? (Select two.)  
**A.** Manage Enterprise Vault indexes.  
**B.** Access Indexing Reports.  
**C.** Configure the "Index Metadata location" setting in the archiving policy.  
**D.** Put indexing locations into Backup Mode.  
**E.** Administer archive properties.

**Answer: B,C**

**NEW QUESTION: 3**You plan to explore demographic data for home ownership in various cities. The data is in a CSV file with the following format:  
age,city,income,home\_owner  
21,Chicago,50000,035,Seattle,120000,123,Seattle,65000,045,Seattle,130000,18,Chicago,48000,0  
You need to run an experiment in your Azure Machine Learning workspace to explore the data and log the results. The experiment must log the following information:  
\* the number of observations in the dataset\* a box plot of income by home\_owner\* a dictionary containing the city names and the average income for each city  
You need to use the

appropriate logging methods of the experiment's run object to log the required information. How should you complete the code? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation: Box 1: `log` The number of observations in the dataset. `run.log(name, value, description="")` Scalar values: Log a numerical or string value to the run with the given name. Logging a metric to a run causes that metric to be stored in the run record in the experiment. You can log the same metric multiple times within a run, the result being considered a vector of that metric. Example: `run.log("accuracy", 0.95)` Box 2: `log_image` A box plot of income by home\_owner. `log_image` Log an image to the run record. Use `log_image` to log a .PNG image file or a matplotlib plot to the run. These images will be visible and comparable in the run record. Example: `run.log_image("ROC", plot=plt)` Box 3: `log_table` A dictionary containing the city names and the average income for each city. `log_table`: Log a dictionary object to the run with the given name.
