NEW QUESTION: 1Exhibit: A company is using HP Network Protector SDN Application with the default RepDV filters. The rest of the configuration is at default. A network administrator wants to determine whether the HP Network Protector application will deny access to a web site. The administrator searches for the domain name and receives the result shown in the exhibit. What can the administrator determine?**A.** The application will block access to the web site during business hours but not at other times.**B.** The application will not block access to the web site at any time or log any messages.**C.** The application will block access to the web site and log attempts to access it.**D.** The application will not block access to the web site at any time, but it will log attempts to access it.**Answer: D**

NEW QUESTION: 2An Approval Process begins when a record is:**A.** Edited**B.** Submitted for Approval**C.** Saved**D.** Created**Answer: B**

NEW QUESTION: 3You are designing a SQL Server Integration Services (SSIS) package that will load data from a source system to a data mart. You need to combine conditionally the value of two project parameters to a package variable. What should you do?**A.** Configure an event handler.**B.** Set the data type property of the variable.**C.** Modify the namespace of the variable.**D.** Set the Expression property of the variable.**Answer: D****Explanation:**Explanation/Reference: Explanation: The Expression property of a variable specifies the expression that is assigned to the variable. References: <https://docs.microsoft.com/en-us/sql/integration-services/integration-services-ssis-variables>

NEW QUESTION: 4You need to implement the Customer Sales and Manufacturing data models. What should you do? (Each correct answer presents a partial solution. Choose all that apply.)**A.** Install a new instance of SSAS in tabular mode.**B.** Use SQL Server Integration Services (SSIS) to copy the database design to the SSAS instance, and specify tabular mode as the destination.**C.** Use the Database Synchronization Wizard to upgrade the database to tabular mode.**D.** Use SQL Server Data Tools (SSDT) to redevelop and deploy the projects.**E.** Use the current SSAS instance.**Answer: A, D****Explanation:**C: Tabular models are authored in SQL Server Data Tools (SSDT) using new tabular model project templates. You can import data from multiple sources, and then enrich the model by adding relationships, calculated columns, measures, KPIs, and hierarchies. Models can then be deployed to an instance of Analysis Services where client reporting applications can connect to them. Deployed models can be managed in SQL Server Management Studio just like multidimensional models. They can also be partitioned for optimized processing and secured to the row-level by using role based security. E: If you are installing Analysis Services to use the new tabular modeling features, you must install Analysis Services in a server mode that supports that type of model. The server mode is Tabular, and it is configured during installation. After you install the server in this mode, you can use it host

solutions that you build in tabular model designer. A tabular mode server is required if you want tabular model data access over the network.*From scenario: / Deploy a data model to allow the ad-hoc analysis of data. The data model must be cached and source data from an OData feed. / All SSAS databases other than the Research database must be converted to tabular BI Semantic Models (BISMs) as part of the upgrade to SSAS 2012. The Research team must have access to the Research database for modeling throughout the upgrade. To facilitate this, you detach the Research database and attach it to SSAS01.*The Business Intelligence Semantic Model (BISM) is a single unified BI platform which has both multi-dimensional as well as tabular data modeling capabilities to offer best of both worlds and choice for the developer.
