NEW QUESTION: 3 You are tasked with configuring IBM Security QRadar SIEM V7.2.7 to pull a log file that generated daily at midnight from a custom application on a Microsoft Windows Server. Which log source protocol should be used to accomplish this task?**A.** WinCollect File Forwarder**B.** WinCollect Log File**C.** WinCollect Agent**D.** WinCollect MSRPC**Answer: C**
Explanation: A managed WinCollect deployment has a QRadar appliance that shares information with the WinCollect agent installed on the Windows hosts that you want to monitor. The Windows host can either gather information from itself, the local host, and, or remote Windows hosts. Note: The WinCollect application is a Syslog event forwarder that administrators can use for Windows event collection with QRadar. The WinCollect application can collect events from systems with WinCollect software installed (local systems), or remotely poll other Windows systems for events. References:
