Usually, you can read the file by double clicking the PDF document, **EGFF_2024 Latest Examprep** if you can't open the file, please download Adobe reader from this link Photoexperienceacademy/ and trying using the Product.

NEW QUESTION: 1A. Option D**B.** Option A**C.** Option C**D.** Option B**Answer: A**Explanation:Topic 5, Contoso LtdOverviewContoso, Ltd. is a manufacturing company that has 3,000 users. Contoso has a data center in Toronto and 20 offices across Canada. The offices connect toeach other by using a WAN link. Each office connects directly to the Internet.Existing Environment Active Directory EnvironmentThe network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2012. All servers run Windows Server 2008 R2.Each office contains three domain controllers. Each office is configured as an Active Directory site.System Center 2012 InfrastructureContoso has a System Center 2012 infrastructure that contains 11 servers. The servers are configured as shown in the following table.---Contoso has a private cloud named Cloud1. Cloud1 is managed by using VMM. Thefollowing applications run in Cloud 1:Microsoft Exchange Server 2010 Microsoft SharePoint Server 2010A custom manufacturing application named App1The Hyper-V hosts are managed by using VMM. TOR-H01 and TOR-H02 are nodes in a failover cluster.The switches that are part of the network fabric are from various manufacturers and are managed by using SNMPv3.App1An application named App1 is deployed from a VMM service template that consists of one front-end web server and one back-end database server. App1 processes credit card information. The instance of App1 running in the data center uses two virtual machines named VM1 and VM2. TOR-H01 hosts VM1 and VM2.App1 is managed by using a custom management pack named MP1. The management pack used to monitor App1 contains a distributed application diagram named App1DAD.The service level agreement (SLA) for App1 states that App1 must be available 99 percent of the time.Problem StatementsContoso identifies the following issues:- Currently, all Operations Manager alerts are sent by email only. Database administrators require alerts to be sent by text message. The cell phone numbers of the database administrators are already configured in Operations Manager.- Administrators report that the processor performance counters for the Hyper-V hosts display values that are lower than the actual load on the hosts.RequirementsBusiness GoalsContoso wants to minimize hardware and software costs, whenever possible.Planned ChangesContoso plans to add a new web server to the App1 service template. Traffic to the new web server will be load balanced with the existing web server by using a hardware load balancer.Technical RequirementsContoso identifies the following technical requirements for the planned deployment: - Automatically apply software updates issued by Microsoft to all of the Hyper-V hosts. - Automatically assign incidents to administrators when a Configuration Manager service fails.- Ensure that the Exchange Server administrators can request that new virtual machines be added to the Exchange Server organization by using Internet Explorer.- Monitor the uptime of all the Hyper-V hosts and all the virtual machines by using Operations Manager and VMM. Performance and Resource Optimization (PRO)enabled management packs will be used.- Ensure that users have a self-service portal that provides them with the ability to back up individual virtual machines. Users must receive an email message confirming that the backup is

complete.- Ensure that database administrators are alerted by a text message when an error occurs on a server that they manage. The text messages should be delivered regardless of the current network conditions.- Network administrators report that they currently use different tools to monitor the port status on the switches. The network administrators want to manage all of the switches by using Operations Manager.App1 RequirementsContoso identifies the following requirements for App1: - Create an object in the App1 management pack to track the SLA. - Ensure that multiple monitoring thresholds can be used for different instances of App1.- Ensure that App1 complies with the Payment Card Industry Data Security Standard (PCI DSS).

NEW QUESTION: 2 Ein Unternehmen verwendet Microsoft 365.Das Unternehmen möchte einen Chat-Bot für die Integration in Microsoft Teams erstellen.Sie müssen eine Lösung finden, um den Chat-Bot zu erstellen.Welche Lösung sollten Sie wählen?**A.** Fernunterstützung**B.** Dynamics 365-Kundendienst**C.** Power Virtual Agent**D.** Dynamics 365-Handbücher**Answer: C**

NEW QUESTION: 3A. Option D**B.** Option A**C.** Option C**D.** Option B**Answer: A**

NEW QUESTION: 4 Which description is true of that the fast-reroute keep all paths command accomplishes when used under OSPF process?**A.** All possible alternate routes are installed in the OSPF RIB, even if the alternate paths do not meet the LFA criteria (the LFA inequalities)**B.** All backup routes - not only the best backup route are installed in the OSPF RIB.**C.** By default, only the /32 routes have a backup path installed. This command creates a backup path for the router with any subnet mask.**D.** Besides the regular LFA backup paths, this command also installs the remote LFA backup paths.**Answer: B**Explanation:
http://www.cisco.com/c/en/us/td/docs/iosxml/ios/iproute_ospf/configuration/xe-3s/iro-lfa-frr-xe.pdf Candidate Repair-Path Lists When OSPF computes a repair path, it keeps in the local RIB only the best from among all the candidate paths, in order to conserve memory. You can use the fast-reroute keep-all-paths command to create a list of all the candidate repair paths that were considered. This information can be useful for troubleshooting but it can greatly increase memory consumption so it should be reserved for testing and debugging.
