NEW QUESTION: 2You administer a Microsoft SQL Server 2014 database.You have a SQL Server Agent job instance that runs using the service account. You have a job step within the job that requires elevated privileges.You need to ensure that the job step can run using a different user account.What should you use?**A.** a proxy**B.** an alert**C.** an operator**D.** a schedule**Answer: A**
Explanation:A SQL Server Agent proxy defines the security context for a job step. A proxy provides SQL Server Agent with access to the security credentials for a Microsoft Windows user. Each proxy can be associated with one or more subsystems. A job step that uses the proxy can access the specified subsystems by using the security context of the Windows user.Before SQL Server Agent runs a job step that uses a proxy, SQL Server Agent impersonates the credentials defined in the proxy, and then runs the job step by using that security context.
