Because our products will help you solve the problem, it will never let you down if you decide to purchase and practice our C_S4CPB_2402 latest question, but then, somehow i came to know about the SAP C_S4CPB_2402 exam dumps.

NEW QUESTION: 1Which two search scope options are removed from a directory handler when you check the "voice enabled" checkbox? (Choose two.)
A. Partition
B. Phone System
C. Class of Service
D. System Distribution List
E. Search Space
Answer: C, D
Explanation:You can configure the scope of a directory handler to define the objects that callers who reach the directory handler can find or hear. For phone directory handlers, you can set the scope to the entire server, to a particular class of service, to a system distribution list, or to a search space (either inherited from the call or specified for the directory handler). For voice-enabled directory handlers, you can set the scope to the entire server or to a search space (either inherited from the call or specified for the directory handler). When callers search a directory handler for a particular name, if the scope of the directory handler is set to a search space, Cisco Unity Connection searches each partition in the search space and returns a list of all of the objects that match the name.
