Tips for passing SAP C-HRHPC-2405 certification exam Know your exam Knowing the challenge, you are going to face helps you find the right information that helps in preparation for the exam.

They have covered all conditions that you will be in to study on our C-HRHPC-2405 learning guide.

NEW QUESTION: 1 Which two data integrity algorithms are commonly used in VPN solutions? (Choose two) **A. HMAC-SHA-1 B. DH2 C. DH1 D. HMAC-MD5 E. RSA** **Answer: A,D**

NEW QUESTION: 2/ SQL * Plus コマンドはどれですか？

(該当するものをすべて選択してください。) **A. 選択 B. DESCRIBE C. 削除 D. 挿入 E. 名前を変更 F. 更新** **Answer: B** Explanation: Describe is a valid iSQL * Plus / SQL * Plus command. INSERT, UPDATE & DELETE are SQL DML Statements. A SELECT is an ANSI Standard SQL Statement not an iSQL * Plus Statement. RENAME is a DDL Statement.

NEW QUESTION: 3 Your network contains a production Active Directory forest named contoso.com and a test Active Directory forest named contoso.test. A trust relationship does not exist between the forests. In the contoso.test domain, you create a backup of a Group Policy object (GPO) named GPO1. You transfer the backup of GPO1 to a domain controller in the contoso.com domain. You need to create a GPO in contoso.com based on the settings of GPO1. You must achieve this goal by using the minimum amount of administrative effort. What should you do? **A. From Windows PowerShell, run the New-GPOcmdlet and the Import-GPOcmdlet. B. From Windows PowerShell, run the Get-GPOcmdlet and the Copy-GPOcmdlet. C. From Group Policy Management, right-click the Group Policy Objects container, and then click Manage Backups. D. From Group Policy Management, create a new GPO. Right-click the new GPO, and then click Import Settings. E. From Windows PowerShell, run the Copy-GPOcmdlet and the Restore-GPOcmdlet. F. From Group Policy Management, create a new starter GPO. Right-click the new starter GPO, and then click Restore from Backup. G. From Windows PowerShell, run the New-GPOcmdlet and the Restore-GPOcmdlet. H. From Group Policy Management, right-click the Starter GPOs container, and then click Manage Backups.** **Answer: A,D** Explanation: When you join a computer to the domain, the system contacts a domain controller, establishes a trust relationship with the domain, locates (or creates) a computer object corresponding to the

computer's name, alters its security identifier (SID) to match that of the computer object, and modifies its group memberships. Since there is no trust relationship you must import the existing settings to the new GPO. Importing the GPO from the domain controller will represent the least effort.

NEW QUESTION: 4You work as a computer technician. When you start your computer, you find that the computer's CMOS battery has failed. You replace the CMOS battery. What will be your next step after replacing the CMOS battery?**A.** Create a partition on the hard disk drive.**B.** Reboot the computer and set the date and time.**C.** Run the DEFRAG utility.**D.** Run the SCANDISK utility.**Answer: B****Explanation:**When a computer's CMOS battery is replaced, the system clock of the computer is reset. Therefore, your next step after replacing the CMOS battery will be to reboot the computer and to set the date and time. What is a CMOS battery? Hide A Complementary Metal Oxide Semiconductor (CMOS) battery is installed on the motherboard. It provides backup to CMOS to store computer hardware configuration, date, and time settings when a computer's main power is off. Note: Incorrect date and time on the computer indicate failure of the CMOS battery. Answer option C is incorrect. SCANDISK is a Windows utility that detects and corrects corruption in the disk when a computer is not shut down properly. It also checks and deletes the corrupt files that may be using up disk space. This helps in improving the performance of a computer. Answer option A is incorrect. DEFRAG is a system utility used to consolidate the fragmented files stored on the hard disk of a computer. The fragmented files are those files that are saved or stored in different locations of the hard disk. The tool arranges such files and stores them on the hard disk in contiguous blocks. The operating system can access these files at a faster rate than the fragmented ones. Answer option B is incorrect. Creating a partition on the hard disk drive has nothing to do with the issue.
