Photoexperienceacademy Financials Cloud 1D0-720 It is quite convenient, But APP Exams Test have made your work easier, now your preparation for 1D0-720 CIW Advanced HTML5 and CSS3 Specialist exam is not tough anymore.

NEW QUESTION: 1 Which of the following is the control when observing network bandwidth patterns over time?
A. Flow data
B. Network log
C. Interface statistics
D. Baseline
Answer: D
Explanation: To successfully baseline a network it is important to consider two functions; performance at protocol level and performance at application level. There are many significant metrics to consider at the protocol level, but only a few which are critical. The most important is bandwidth utilization compared with bandwidth availability. The most likely cause of poor network performance is insufficient bandwidth. Trending bandwidth utilization allows you to recognize problem areas, provide enough bandwidth to reach performance objectives, and predict future capacity requirements. Changes in bandwidth utilization patterns also provide a clear indication of network usage alterations, such as a change in end-user behavior, or the unauthorized addition of an application. Topic 5, Network Security

NEW QUESTION: 2 Which of the following BEST explains 'likelihood of occurrence'?
A. The probability that a threat actor will target and attempt to exploit an organization's systems
B. The potential for a system to have a weakness or flaw that might be exploited
C. The chance that an event will happen regardless of how much damage it may cause
D. The overall impact to the organization once all factors have been considered
Answer: A
