NEW QUESTION: 1Your company has a main office and a branch office. The network contains an Active Directory forest. All users on the network access the Internet from their computers. The company hires a temporary employee who has his own portable computer. The employee connects his portable computer to the network. When the employee attempts to join the computer to the domain, the connection fails. A help desk technician reports the following about the employee: -He has a domain user account. -His computer can access Internet Web sites. -His computer can contact domain controllers by using the domain controllers' IP addresses. You need to ensure that the employee's computer can join the domain. The solution must ensure that the computer can access resources on the Internet. What should you do? **A.** Request that an administrator create a prestaged computer account in the domain. **B.** Modify the IPv4 settings on the computer. **C.** Modify the time zone for the computer. **D.** Create an A record for the computer in an internal DNS zone. **Answer: B**

NEW QUESTION: 2Why is MAC explosion a factor to be considered when designing a large VPLS network? (Choose 2) **A.** It could take several seconds to relearn thousands of MAC addresses denying QoS/SLA guarantees. **B.** Discarding frames when the FDB limit is reached could deny SLA guarantees. **C.** If the FDB reaches the limit, the router will discard frames. **D.** The time to relearn thousands of MAC addresses may result in excessive flooding or loss of packets. **Answer: A,D**

NEW QUESTION: 3Refer to the exhibit. The network switches for two companies have been connected and manually configured for the required VLANs, but users in company A are not able to access network resources in company B when DTP is enabled. Which action resolves this problem? **A.** Manually force trunking with switchport mode trunk on both switches. **B.** Disable DTP and document the VTP domain mismatch. **C.** Enable the company B switch with the vtp mode server command. **D.** Delete vlan.dat and ensure that the switch with lowest MAC address is the VTP server. **Answer: A** Explanation: Explanation/Reference: Explanation: Since the number of existing VLANs differ on the switches (9 on A and 42 on B) we know that there is a problem with VTP or the trunking interfaces. The VTP domain names do match and they are both VTP servers so there are no issues there. The only viable solution is that there is a DTP issues and so you must instead manually configure the trunk ports between these two switches so that the VLAN information can be sent to each switch.

NEW QUESTION: 4Which optional software component is available on IBM Storwize V7000 but not Storwize V5000? **A.** Real-time Compression **B.** Advanced copy services **C.** FlashCopy **D.** Easy Tier **Answer: A**
