NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. The domain contains 500 client computers that run Windows 8.1 Enterprise and Microsoft Office 2013.You implement a Group Policy central store.You need to modify the default Microsoft Office 2013 Save As location for all client computers. The solution must minimize administrative effort.What should you configure in a Group Policy object (GPO)?**A.** The Group Policy preferences**B.** An application control policy**C.** The Administrative Templates**D.** The Software Installation settings**Answer: A****Explanation:** Group Policy preferences provide the means to simplify deployment and standardize configurations. They add to Group Policy a centralized system for deploying preferences (that is, settings that users can change later). You can also use Group Policy preferences to configure applications that are not Group Policy-aware. By using Group Policy preferences, you can change or delete almost any registry setting, file or folder, shortcut, and more. You are not limited by the contents of Administrative Template files.:
