**C.** Azure Cost ManagementからCost Managementレポートを作成します。  
**D.** Azureポータルから、Advisorの推奨事項を構成します。

**Answer: A**  
**Explanation:** You can find unused disks in the Azure Storage Explorer console. Once you drill down to the Blob containers under a storage account, you can see the lease state of the residing VHD (the lease state determines if the VHD is being used by any resource) and the VM to which it is leased out. If you find that the lease state and the VM fields are blank, it means that the VHD in question is unused. Note: The ManagedBy property stores the Id of the VM to which Managed Disk is attached to. If the ManagedBy property is \$null then it means that the Managed Disk is not attached to a VM. References: <https://cloud.netapp.com/blog/reduce-azure-storage-costs>
