And you will be content about our considerate service on our PCNSE training guide, So if you purchase our PCNSE practice test online, just practice them about [MB-800 Actual Test Answers](#) 2 hours a day regularly and persistently, you can successfully pass the test.

All the contents of our PCNSE training dumps are organized logically.

**NEW QUESTION: 1**Ihr Unternehmen verfügt über ein Microsoft 365-Abonnement, das die in der folgenden Tabelle aufgeführten Benutzer enthält.Sie müssen angeben, welche Benutzer die folgenden Verwaltungsaufgaben ausführen können:\* Ändern Sie die Kennwortschutzrichtlinie.\* Erstellen Sie Gastbenutzerkonten.Welche Benutzer sollten Sie für jede Aufgabe identifizieren? Wählen Sie zum Beantworten die entsprechenden Optionen im Antwortbereich aus.HINWEIS: Jede richtige Auswahl ist einen Punkt wert.**Answer:** Explanation:ExplanationOnly a Global Admin can modify the password protection policy.A Global Admin or a user with the Guest Inviter role can create guest accounts.Reference: <https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-password-ban-bad-on-premises-op>

**NEW QUESTION: 2**Robert Williams is a junior analyst at Anderson Brothers, a large Wall Street brokerage firm. He reports to Will McDonald, the chief economist for Anderson Brothers. McDonald provides economic research, forecasts, and interpretation of economic data to all of Anderson's investment departments, as well as the firm's clients. McDonald has asked Williams to analyze economic trends in the country of Bundovia. The currency of Bundovia is the Bunco (BU).Williams first analyzes the effect of rising nominal Bundovian interest rates relative to U.S interest rates on the supply and demand for BU. He determines that the increase in Bundovian nominal interest rates would increase the demand for BU and, because the BU supply curve is upward sloping, the BU will appreciate and the equilibrium quantity of BU will increase proportionately.Bundovia has announced plans to impose either a tariff or a quota on semiconductor imports from the United States. McDonald also asks Williams to analyze the potential effect on Bundovian Semiconductors, the dominant semiconductor manufacturer located in Bundovia. Currently, Bundovian Semiconductors is not competitive in the global semiconductor market because its higher production costs make it unable to generate profits at the current world market price. Williams concludes that the imposition of either a tariff or quotas would benefit Bundovian Semiconductors. The company would become competitive with foreign producers in its domestic semiconductor market because imports would be reduced and domestic production would rise.Exhibit 1 shows the trend in the average BU/USD exchange rate over the past three years.Williams asks the bank for a GBP/SFr cross rate.From the same bank, Williams receives the following forward rate quotes in the USD/GBP market:\* 30-day forward rate: USD/GBP = USD/GBP = 2.0045 - 55\* 60-day forward rate: USD/GBP =

USD/GBP = 2.0075 - 85Williams has uncovered a potential arbitrage opportunity in the foreign exchange markets. The current spot rate is \$2.00 per BU. The Bundovian risk-free interest rate is 3%, and the one-year forward rate is \$2.10 per BU. The U.S. risk-free rate is 5%. Is Williams's analysis of the effect of rising nominal Bundovian interest rates on the value and equilibrium quantity of the BU correct?  
**A.** No, because the supply of BU will also increase, and the BU will depreciate instead of appreciate.  
**B.** No, because the supply of BU will decrease and, as a result, the equilibrium quantity of BU will not change significantly.  
**C.** Yes.  
**Answer: B**  
**Explanation:** Explanation/Reference: Explanation: Rising nominal Bundovian interest rates will increase the demand for BU and decrease the supply of BU. The increase in demand, all else equal, will cause the BU to appreciate and increase the equilibrium quantity. The decrease in supply, all else equal, will also cause the BU to appreciate but decrease the equilibrium quantity demanded. The net effect of these two changes is to cause the BU to appreciate. However, the separate effects on quantity demanded will offset, and the equilibrium quantity will not be significantly affected. (Study Session 4, LOS 17.c and 19.d)

**NEW QUESTION: 3** What is the BEST backup strategy for a large database with data supporting online sales?  
**A.** Clustered servers  
**B.** Daily full backup  
**C.** Weekly full backup with daily incremental backup  
**D.** Mirrored hard disks  
**Answer: C**  
**Explanation:** Explanation/Reference: Explanation: Weekly full backup and daily incremental backup is the best backup strategy; it ensures the ability to recover the database and yet reduces the daily backup time requirements. A full backup normally requires a couple of hours, and therefore it can be impractical to conduct a full backup every day. Clustered servers provide a redundant processing capability, but are not a backup. Mirrored hard disks will not help in case of disaster.
