NEW QUESTION: 1 A company has an Office 365 tenant. You must retrieve mailbox diagnostic data. You need to provide a report with this data for all users. Which report solution should you choose?
A. downloadable spreadsheet
B. REST reporting web service
C. reporting Windows PowerShell cmdlets
D. Office 365 admin center
Answer: B
Explanation: The Office 365 Reporting web service enables developers to integrate information on email and spam, antivirus activity, compliance status, and Lync Online activities into their custom service reporting applications and web portals.
Incorrect: Not A: Office 365 admin center provide predefined charts and lists reports. Not B: Detailed, flexible analysis of historical and live service data, for example in Microsoft Excel-based score-cards. Not C: reporting Windows PowerShell cmdlets: Precise data for periodically generated reports in script-based IT maintenance tools.

NEW QUESTION: 2 You need to recommend a solution that allows partners to authenticate. Which solution should you recommend?
A. Configure the federation provider to trust social identity providers.
B. Create an account on the VanArsdel domain for the partner and send an email message that contains the password to the partner.
C. Create a new directory in Azure Active Directory and create a user account for the partner.
D. Configure the federation provider to use the Azure Access Control service.
Answer: D
Explanation: Scenario: The partners all use Hotmail.com email addresses. * In Microsoft Azure Active Directory Access Control (also known as Access Control Service or ACS), an identity provider is a service that authenticates user or client identities and issues security tokens that ACS consumes. The ACS Management Portal provides built-in support for configuring Windows Live ID as an ACS Identity Provider.
Incorrect: Not C, not D: Scenario: VanArsdel management does NOT want to create and manage user accounts for partners.
