NEW QUESTION: 1You have an Exchange Server 2013 organization that has Information Rights Management (IRM) configured. Users report that they cannot apply IRM protection to email messages from Outlook Web App. You verify that the users can protect the messages by using IRM from Microsoft Outlook. You need to recommend a solution to ensure that the users can protect email messages by using IRM from Outlook Web App. Which four actions should you recommend? To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order. Select and Place: **Answer:** Explanation: Explanation/Reference: Box 1: Create a distribution group named Group1. Box 2: Add the Microsoft Exchange Federation Mailbox user account to Group1. Box 3: Enable the super users group and set the group to Group1. Box 4: Run the Set-IRMConfiguration cmdlet. Note: *To enable IRM in Outlook Web App, you must add the Federation mailbox, a system mailbox created by Exchange 2013 Setup, to the super users group in AD RMS. *Step 1: Use the Shell to add the Federation mailbox to a distribution group If a distribution group has been created and configured as a super users group in the AD RMS cluster, you can add the Exchange 2013 Federation mailbox as a member of that group. If a super users group isn't configured, you must create a distribution group and add the Federation mailbox as a member. 1. Create a distribution group dedicated for use as an AD RMS super users group. 2. Add the user FederatedEmail.4c1f4d8b4148-93bf-00a95fa1e042 to the new distribution group. Step 2: Use

AD RMS to set up a super users group Perform the following procedure on an AD RMS cluster. The account used to perform this procedure must be a member of the AD RMS Enterprise Administrators local group on the AD RMS server.* Information workers increasingly use e-mail to exchange sensitive information. To help secure this information, organizations can use Information Rights Management (IRM) to apply persistent protection to messaging content. Prior to Microsoft Exchange Server 2010, effective use of IRM protection was limited to Outlook clients. In Exchange Server 2007, Microsoft Outlook Web Access users were required to download the Rights Management add-in for Microsoft Internet Explorer so they could access IRM-protected content. In Exchange 2013, IRM in Outlook Web App allows your users to access the rich IRM functionality offered by Exchange to apply persistent IRM-protection to messaging content. Reference: Information Rights Management in Outlook Web App Reference: Add the Federation Mailbox to the AD RMS Super Users Group
