Box 1: Sampling Create a sample of data This option supports simple random sampling or stratified random sampling. This is useful if you want to create a smaller representative sample dataset for testing. 1. Add the Partition and Sample module to your experiment in Studio, and connect the dataset. 2. Partition or sample mode: Set this to Sampling. 3. Rate of sampling. See box 2 below. Box 2: 03. Rate of sampling. Random seed for sampling: Optionally, type an integer to use as a seed value. This option is important if you want the rows to be divided the same way every time. The default value is 0, meaning that a starting seed is generated based on the system clock.
