This brief guide provides knowledge about every concept **1D0-720 Official Study Guide** of CIW Web and Mobile Design Series that can be tested in the final exam, These sample question papers covers almost all the topics.

On the other hand, the 1D0-720 study engine are for an office worker, free profession personnel have different learning arrangement, such extensive audience greatly improved the core competitiveness of our products, to provide users with better suited to their specific circumstances of high quality learning resources, according to their aptitude, on-demand, maximum play to the role of the 1D0-720 exam question.

Pass Guaranteed Quiz 2024 Pass-Sure CIW 1D0-720: CIW Advanced HTML5 and CSS3 Specialist Official Study Guide

Once confirmed we will refund you two days except of official holidays, 1D0-720 learning materials are high-quality, and they will help you pass the exam, Exam-Oriented CIW Advanced HTML5 and CSS3 Specialist Practice Questions.

We are not the company that selling the 1D0-720 test torrent written years ago, but offer the newest 1D0-720 actual test questions: CIW Advanced HTML5 and CSS3 Specialist according to the development of time.

24/7 after sale service- 1D0-720 exam prep material, How can we change this terrible circumstance, Once our 1D0-720 dumps guide: CIW Advanced HTML5 and CSS3 Specialist has new version, you can download free [CIW Advanced HTML5 and CSS3 Specialist](#) of charge within one year, that means you can always get the latest valid exam study guide.

But we can guarantee that our 1D0-720 real exam crams are reliable.

NEW QUESTION: 1A. Option CB. Option BC. Option DD. Option EE. Option A**Answer: A,D**

NEW QUESTION: 2Which two descriptions of Fibre WWNs are true? (Choose two.)**A.** 48bits long **B.** allocated to manufactures by IEEE**C.** 96 bits long**D.** manually configured on each device by an administrator**E.** 64 or 128 bits long**Answer: B,E**

NEW QUESTION: 3You need to ensure phone-based polling data upload reliability requirements are met. How should you configure monitoring? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.
Answer: Explanation:ExplanationBox 1: FileCapacityFileCapacity is the amount of storage used by the storage account's File service in bytes.Box 2: AvgThe aggregation type of the FileCapacity metric is Avg.Scenario:All services and processes must be resilient to a regional Azure outage.All Azure services must be monitored by using Azure Monitor. On-premises SQL Server performance must be monitored.References:
<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/metrics-supported>Topic 2, Contoso LtdOverviewCurrent environmentContoso relies on an extensive partner network for marketing, sales, and distribution. Contoso uses external companies that manufacture everything from the actual pharmaceutical to the packaging.The majority of the company's data reside in Microsoft SQL Server database. Application databases fall into one of the following tiers:The company has a reporting infrastructure that ingests data from local databases and partner services.Partners services consists of distributors, wholesales, and retailers across the world. The company performs daily, weekly, and monthly reporting. RequirementsTier 3 and Tier 6 through Tier 8 application must use database density on the same server and Elastic pools in a cost-effective manner.Applications must still have access to data from both internal and external applications keeping the data encrypted and secure at rest and in transit.A disaster recovery strategy must be implemented for Tier 3 and Tier 6 through 8 allowing for failover in the case of server going offline.Selected internal applications must have the data hosted in single Microsoft Azure SQL Databases.Tier 1 internal applications on the premium P2 tierTier 2 internal applications on the standard S4 tierThe solution must support migrating databases that support external and internal application to Azure SQL Database. The migrated databases will be supported by Azure Data Factory pipelines for the continued movement, migration and updating of data both in the cloud and from local core business systems and repositories.Tier 7 and Tier 8 partner access must be restricted to the database only.In addition to default Azure backup behavior, Tier 4 and 5 databases must be on a backup strategy that performs a transaction log backup eve hour, a differential backup of databases every day and a full back up every week.Back up strategies must be put in place for all other standalone Azure SQL Databases using Azure SQL-provided backup storage and capabilities.DatabasesContoso requires their data estate to be designed and implemented in

the Azure Cloud. Moving to the cloud must not inhibit access to or availability of data. Databases: Tier 1 Database must implement data masking using the following masking logic: Tier 2 databases must sync between branches and cloud databases and in the event of conflicts must be set up for conflicts to be won by on-premises databases. Tier 3 and Tier 6 through Tier 8 applications must use database density on the same server and Elastic pools in a cost-effective manner. Applications must still have access to data from both internal and external applications keeping the data encrypted and secure at rest and in transit. A disaster recovery strategy must be implemented for Tier 3 and Tier 6 through 8 allowing for failover in the case of a server going offline. Selected internal applications must have the data hosted in single Microsoft Azure SQL Databases. Tier 1 internal applications on the premium P2 tier Tier 2 internal applications on the standard S4 tier Reporting Security and monitoring Security A method of managing multiple databases in the cloud at the same time is must be implemented to streamlining data management and limiting management access to only those requiring access. Monitoring Monitoring must be set up on every database. Contoso and partners must receive performance reports as part of contractual agreements. Tiers 6 through 8 must have unexpected resource storage usage immediately reported to data engineers. The Azure SQL Data Warehouse cache must be monitored when the database is being used. A dashboard monitoring key performance indicators (KPIs) indicated by traffic lights must be created and displayed based on the following metrics: Existing Data Protection and Security compliances require that all certificates and keys are internally managed in an on-premises storage. You identify the following reporting requirements: Azure Data Warehouse must be used to gather and query data from multiple internal and external databases Azure Data Warehouse must be optimized to use data from a cache Reporting data aggregated for external partners must be stored in Azure Storage and be made available during regular business hours in the connecting regions Reporting strategies must be improved to real time or near real time reporting cadence to improve competitiveness and the general supply chain Tier 9 reporting must be moved to Event Hubs, queried, and persisted in the same Azure region as the company's main office Tier 10 reporting data must be stored in Azure Blobs Issues Team members identify the following issues: Both internal and external client application run complex joins, equality searches and group-by clauses. Because some systems are managed externally, the queries will not be changed or optimized by Contoso External partner organization data formats, types and schemas are controlled by the partner companies Internal and external database development staff resources are primarily SQL developers familiar with the Transact-SQL language. Size and amount of data has led to applications and reporting solutions not performing are required speeds Tier 7 and 8 data access is constrained to single endpoints managed by partners for access The company maintains several legacy client applications. Data for these applications remains isolated form other applications. This has led to hundreds of databases being provisioned on a per application basis

NEW QUESTION: 4 A music executive is trying to determine the effect that advertising expenditures (in dollars) have on digital music sales. After gathering sales data from the previous 12 quarters, the executive finds the effect that advertising expenditures have on digital music sales can be described by the following equation: $\text{Digital music sales} = 9,500 + 0.15 * (\text{advertising expenditures})$ Based on this equation, which of the statements below is correct? **A.** Each additional \$1,000 spent on advertising increases digital music sales by \$0.15 on average. **B.** Each additional \$0.15 spent on advertising increases digital music sales by \$1.00 on average. **C.** Each additional \$1.00 spent on advertising increases digital music sales by \$0.15 on average. **D.** Each additional \$1.00 spent on advertising increases digital music sales by 9,500 units on average. **Answer: C**
