**NEW QUESTION: 1**Which type of for loops are defined with the following syntax?FOR(initstmt; exit\_condition; increment stmt){ codeblock }---Traditional for loops List iteration for loops Set iteration for loops- SOQLforloops(No Answer)**A.** Static and final**B.** SOQL for loops**C.** Agovernor limit**D.** Traditional for loops**Answer: D**

**NEW QUESTION: 2**A third party was engaged to develop a business application. Which of the following would an information security manager BEST test for the existence of back doors?**A.** Reverse engineering the application binaries**B.** Security code reviews for the entire application **C.** Running the application from a high-privileged account on a test system**D.** System monitoring for traffic on network ports**Answer: B****Explanation:**Explanation/Reference: Explanation:Security' code reviews for the entire application is the best measure and will involve reviewing the entire source code to detect all instances of back doors. System monitoring for traffic on network ports would not be able to detect all instances of back doors and is time consuming and would take a lot of effort. Reverse engineering the application binaries may not provide any definite clues. Back doors will not surface by running the application on high-privileged accounts since back doors are usually hidden accounts in the applications.
