In addition, if user's access objects both through CloudFront and directly by using Amazon S3 URLs, CloudFront ace logs are less useful because they're incomplete.Option A is invalid because you need to create a Origin Access Identity for Cloudfront and not an 1AM user Option C and D are invalid because using policies will not help fulfil the requirement For more information on Origin Access Identity please see the below Link: http://docs.aws.amazon.com/AmazonCloudFront/latest/DeveloperGuide/private-content-restrictine-access-to-s3.htmll The correct answer is: Create an Origin Access Identity (OAI) for CloudFront and grant access to the objects in your S3 bucket to that OAI.(Submit your Feedback/Queries to our Experts
