Fast Download GB0-372-ENU Related Exams & Guaranteed H3C GB0-372-ENU Exam Success with Excellent GB0-372-ENU Knowledge Points

Photoexperienceacademy ensures 100% money back guarantee if failed your H3CSE-Routing & Switching GB0-372-ENU exam in 90 days, just send your score report in attachment to [\[email#protected\]](mailto:[email#protected]), then a full refund will be processed immediately.

You really can't find a more cost-effective product than GB0-372-ENU learning quiz, The GB0-372-ENU exam dumps can be downloaded in no time after purchase, thus you won't waste your time and can study GB0-372-ENU PDF training material immediately.

On the other hand, we guarantee that our H3CSE-RS-SW exam study material is the most latest, with the careful check from our experts, you don't need to worry the quality of our GB0-372-ENU latest vce demo.

Thus the learners can master our GB0-372-ENU practice engine fast, conveniently and efficiently and pass the GB0-372-ENU easily, I know that you are already determined to make a change, and our GB0-372-ENU exam materials will spare no effort to help you.

Now I will introduce you our GB0-372-ENU exam tool in detail, I hope you will like our GB0-372-ENU exam questions, Now, you may need some efficient study tool to help you.

NEW QUESTION: 1You have a pay-as-you-go Azure subscription that contains the virtual machines shown in the following table.You create the budget shown in the following exhibit. The AG1 action group contains a user named [\[email#protected\]](mailto:[email#protected]) only.Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation: Explanation:When the budget thresholds you've created are exceeded, only notifications are triggered. None of your resources are affected and your consumption isn't stopped. You can use budgets to compare and track spending as you analyze costs.Box 2: one email notification will be sent each monthBudget alerts for Resource Group RG1, which include VM1, but not VM2.VM1 consumes 20 Euro/day. The 50% ,500 Euro limit, will be reached in 25 days, and an email will be sent.The 70% and 100% alert conditions will not be reached within a month, and they don't trigger email actions anyway.References:

<https://docs.microsoft.com/en-gb/azure/cost-management-billing/costs/tutorial-acm-create-budgets>

<https://docs.microsoft.com/en-us/azure/cost-management-billing/costs/cost-mgt-alerts-monitor-usage-spending>

NEW QUESTION: 2You need to design the storage for the Health Insights data platform.Which types of tables should you include in the design? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.**Answer:** Explanation:

ExplanationBox 1: Hash-distributed tablesThe new Health Insights application must be built on a massively parallel processing (MPP) architecture that will support the high performance of joins on large fact tables.Hash-distributed tables improve query performance on large fact tables.Box 2: Round-robin distributed tablesA round-robin distributed table distributes table rows evenly across all distributions. The assignment of rows to distributions is random.

Scenario:ADatum identifies the following requirements for the Health Insights application:***** The new Health Insights application must be built on a massively parallel processing (MPP) architecture that will support the high performance of joins on large fact tables.References:

<https://docs.microsoft.com/en-us/azure/sql-data-warehouse/sql-data-warehouse-tables-distribute>
Topic 5, Data Engineer for Trey Research
Overview You are a data engineer for Trey Research. The company is close to completing a joint project with the government to build smart highways infrastructure across North America. This involves the placement of sensors and cameras to measure traffic flow, car speed, and vehicle details.You have been asked to design a cloud solution that will meet the business and technical requirements of the smart

highway. Solution components Telemetry Capture The telemetry capture system records each time a vehicle passes in front of a sensor. The sensors run on a custom embedded operating system and record the following telemetry data:
* Time
* Location in latitude and longitude
* Speed in kilometers per hour (kmph)
* Length of vehicle in meters

Visual Monitoring The visual monitoring system is a network of approximately 1,000 cameras placed near highways that capture images of vehicle traffic every 2 seconds. The cameras record high resolution images. Each image is approximately 3 MB in size.

Requirements: Business The company identifies the following business requirements:
* External vendors must be able to perform custom analysis of data using machine learning technologies.
* You must display a dashboard on the operations status page that displays the following metrics: telemetry, volume, and processing latency.
* Traffic data must be made available to the Government Planning Department for the purpose of modeling changes to the highway system. The traffic data will be used in conjunction with other data such as information about events such as sporting events, weather conditions, and population statistics.

External data used during the modeling is stored in on-premises SQL Server 2016 databases and CSV files stored in an Azure Data Lake Storage Gen2 storage account.

* Information about vehicles that have been detected as going over the speed limit during the last 30* minutes must be available to law enforcement officers. Several law enforcement organizations may respond to speeding vehicles.

* The solution must allow for searches of vehicle images by license plate to support law enforcement investigations. Searches must be able to be performed using a query language and must support fuzzy searches to compensate for license plate detection errors.

Requirements: Security The solution must meet the following security requirements:
* External vendors must not have direct access to sensor data or images.
* Images produced by the vehicle monitoring solution must be deleted after one month. You must minimize costs associated with deleting images from the data store.
* Unauthorized usage of data must be detected in real time. Unauthorized usage is determined by looking for unusual usage patterns.
* All changes to Azure resources used by the solution must be recorded and stored. Data must be provided to the security team for incident response purposes.

Requirements: Sensor data You must write all telemetry data to the closest Azure region. The sensors used for the telemetry capture system have a small amount of memory available and so must write data as quickly as possible to avoid losing telemetry data.

NEW QUESTION: 3The two methods of code reuse that aggregate the features located in multiple classes are_____ ?
A. Refactoring
B. Virtual Method Invocation
C. Inheritance
D. Composition
E. Copy and Paste

Answer: **C,D**

Explanation:Explanation/Reference:Explanation:
A: Inheritance is a way of reusing code and building bigger more functional objects from a basic object. The original little object, the parent, is called the super-class. The more functional object that inherits from it is called the sub-class .
C: When your goal is code reuse, composition provides an approach that yields easier-to-change code.
