**NEW QUESTION: 1**Which two Cisco IOS XE commands can install a subpackage onto a router? (Choose two.)  
**A.** license install file storedLocationUrl  
**B.** request platform software package install rp rpSlotNumber file fileURL  
**C.** boot system flash bootflash:filename  
**D.** issu loadversion rp identifier file diskType imageFilename  
**E.** config-register value  
**F.** copy sourceUrl destinationUrl  
**Answer: B,F**  
**Explanation:-** Managing and Configuring a Consolidated Package  
Using the request platform software package install Command In the following example, the request platform software package install command is used to upgrade a consolidated package running on RP 0. The force option, which forces the upgrade past any prompt (such as already having the same consolidated package installed), is used in this example. Router# request platform software package install rp 0 file bootflash:asr1000rp1adventerprisek9.02.01.00.122-33.XNA.bin force To upgrade a consolidated package on the Cisco ASR 1000 Series Routers using the copy command, copy the consolidated package into the bootflash: directory on the router using the copy command as you would on most other Cisco routers. After making this copy, configure the router to boot using the consolidated package file. In the following example, the consolidated package file is copied onto the bootflash: file system from TFTP. The config-register is then set to boot using boot system commands, and the boot system commands instruct the router to boot using the consolidated package stored in the bootflash: file system. The new configuration is then saved using the copy running-config startup-config command, and the system is then reloaded to complete the process. Router# dir bootflash: Directory of bootflash:/11 drwx 16384 Dec 4 2007 04:32:46 -08:00 lost+found86401 drwx 4096 Dec 4 2007 06:06:24 -08:00.ssh14401 drwx 4096 Dec 4 2007 06:06:36 -08:00.rollback\_timer28801 drwx 4096 Mar 18 2008 17:31:17 -07:00.prst\_sync 43201 drwx 4096 Dec 4 2007 04:34:45 -08:00.installer13 -rw- 45977 Apr 9 2008 16:48:46 -07:00 target\_support\_output.tgz.tgz928862208 bytes total (712273920 bytes free)Router# copy tftp bootflash:Address or name of remote host []? 172.17.16.81Source filename []? /auto/tftp-users/user/asr1000rp1-adventerprisek9.02.01.00.12233.XNA.binDestination filename [asr1000rp1-adventerprisek9.02.01.00.122-33.XNA.bin]?Reference:
