NEW QUESTION: 1An approved work order has been assigned an incorrect job plan. How do you correct this?**A.** Select Remove Work Plan from the More Actions menu and enter the correct job plan.**B.** Create a Follow-up work order with the correct job plan.**C.** Clear the Job Plan field and enter the correct job plan**D.** Change the Job Plan Revision to the correct revision**Answer: A**

NEW QUESTION: 2Which four statements are true about the Cisco IPS global correlation and reputation filtering features? (Choose four.)**A.** Both global correlation and reputation filtering leverage Cisco SenderBase.**B.** Global correlation can adjust the risk rating of an alert.**C.** Global correlation can be trialed in with a test mode.**D.** Reputation filtering can be set to permissive, standard, or aggressive.**E.** Reputation filtering can adjust the risk rating of an alert.**F.** Reputation filtering can drop packets from untrusted source IP addresses.**Answer: A,B,C,F**

Explanation:

http://www.cisco.com/en/US/docs/security/ips/7.0/configuration/guide/idm/idm_collaboration.html#wp1056492Global Correlation RequirementsGlobal correlation has the following requirements:Valid license-You must have a valid sensor license for global correlation features to function. You can still configure and display statistics for the global correlation features, but the global correlation databases are cleared and no updates are attempted. Once you install a valid license, the global correlation features are reactivated.Agree to Network Participation disclaimerExternal connectivity for sensor and a DNS server-The global correlation features of IPS 7.0 require the sensor to connect to the Cisco SensorBase Network. Domain name resolution is also required for these features to function. You can either configure the sensor to connect through an HTTP proxy server that has a DNS client running on it, or you can assign an Internet routeable address to the management interface of the sensor and configure the sensor to use a DNS server. In IPS 7.0 the HTTP proxy and DNS servers are used only by the global correlation features

NEW QUESTION: 3In your company, authentication information is stored in a central Oracle repository.However, authorization information is spread across several different SQL Server andOracle user directories associated with specific applications. The Social Security Number (SSN) of employees is common to all user directories. You are likely to use LightweightDirectory Access Protocol (LDAP) directories in the near future. Which statement about CASiteMinder directory mapping options is TRUE?**A.** When mapping relational database directories to each other, Universal ID is the only method available.**B.** You can choose between the Universal ID and Identical DN methods when mapping relational databases with the central Oracle repository for authentication.**C.** It is best to use the identical DN method to mapLDAP

directories to the central Oracle repository. **D.** When mapping LDAP user directories to the central Oracle repository, Universal ID is the only method available. **Answer: D**
