It does not overlap with the content of the Salesforce-Hyperautomation-Specialist question banks on the market, and avoids the fatigue caused by repeated exercises, Here I would like to explain the core value of Photoexperienceacademy exam dumps.

NEW QUESTION: 1Which of the following credit arrangements would most likely be considered a purpose credit because it is indirectly secured by margin stock?**A.** A loan made to a company for various corporate purposes, including the purchase of margin stock, secured by the corporate assets, which from time to time include margin stock; on the date of the consummation of the transaction approximately 10 percent of the assets of the company are margin stock**B.** A loan made to purchase margin stock, guaranteed by an individual who has pledged margin stock as security for the guarantee**C.** Bank is the trustee for a qualified pension plan from which the participants may borrow and use their interest in the plan as security; a participant borrows money for the purpose of purchasing margin stock**D.** A loan made to purchase margin stock secured by nonmargin stock**Answer: B**

NEW QUESTION: 2A local gateway is registered to Cisco TelePresence Video Communication Server with a prefix of 7. The administrator wants to stop calls from outside the organization being routed through it. Which CPL configuration accomplishes this goal?**A)** **B)** **C)** **D)** **E)****A.** Exhibit B **B.** Exhibit EC. Exhibit DD. Exhibit CE. Exhibit A**Answer: E**

NEW QUESTION: 3Ferris Plastics, Inc. is a medium sized company, with an enterprise network (access, distribution and core switches) that provides LAN connectivity from user PCs to corporate servers. The distribution switches are configured to use HSRP to provide a high availability solution.* DSW1 -primary device for VLAN 101 VLAN 102 and VLAN 105* DSW2 - primary device for VLAN 103 and VLAN 104* A failure of GigabitEthernet1/0/1 on primary device

should cause the primary device to release its status as the primary device, unless GigabitEthernet1/0/1 on backup device has also failed. Troubleshooting has identified several issues. Currently all interfaces are up. Using the running configurations and show commands, you have been asked to investigate and respond to the following question. All interfaces are active. DSW2 has not become the active device for the VLAN 103 HSRP group. As related to the VLAN 103 HSRP group, what can be done to make the group function properly? **A.** On DSW2, increase the priority value to a value greater 200 and less than 250. **B.** On DSW1, decrease the priority value to a value less than 190 and greater than 150. **C.** On DSW2, increase the decrement value in the track command to a value greater than 10 and less than 50. **D.** On DSW1, disable preempt. **Answer: A**

Explanation: The reason DSW2 has not become the active switch for Vlan103 is because the priority value of DSW1 is higher than that of DSW2. In order to make DSW2 become the active switch, we need to increase DSW2's priority (to higher than 200) or decrease DSW1's priority (to lower than 190) -> B and C are correct. But there is another requirement from this question that "A failure on gig1/0/1 on primary device should cause the primary device to release its status as the primary device, unless GigabitEthernet 1/0/1 on backup device has also failed". This requirement makes answer B incorrect. For example, we choose to decrease the priority value on DSW1 to 160 (according to answer B) then DSW2 will become active switch (that is good). When Gi1/0/1 on DSW2 goes down, the priority of DSW2 will be $190 - 50 = 140 < 160$ -> DSW1 will become new active switch (it is good, too). But when Gi1/0/1 on DSW1 also goes down, the priority of DSW1 will be $160 - 10 = 150$ and it is still greater than 140 of DSW2 -> DSW2 cannot retake the active role as the requirement of this question.

NEW QUESTION: 4 Jack cannot get two buttons on his Web form to display when using a Web browser. What is the most likely cause of this problem? **A.** The database preference "Web access: use JavaScript when generating pages" is not selected. **B.** Only the Submit button displays for Web clients. **C.** Multiple buttons on a form must be coded using JavaScript. **D.** The form property "Web Access: Show buttons" must be selected. **Answer: A**
