Identify your weak points and target them as much as you can, Please feel free to download the NS0-404 pdf demo.

**NEW QUESTION: 1** While looking at the conversations page you notice one user account logging into a number of servers on a regular basis. Is this information that you can draw from this activity? (This could be a service account and should be excluded from correlating Logon events with devices, or every device it logs into will be credited to it as the owner.) **A. Yes B. No**

**Answer: B**

**NEW QUESTION: 2** A restricted area containing a security interest or other sensitive matter, which uncontrolled movement can permit access to the security interest or sensitive matter, but within which access may be prevented by security escort and other internal restrictions and controls, is called a(n): **A. None of the above B. Exclusion area C. Controlled area D. Limited area E. Sensitized area**

**Answer: D**

**NEW QUESTION: 3** When using VMware HA, the larger the consolidation ratio, the smaller the potential impact to the business in the event of a VMware HA event. **A. False B. True** **Answer: A**  
Explanation: VMware HA can satisfy the majority of RTO scenarios. In general, businesses can tolerate small outages of shorter than a few minutes. Designed correctly, HA can satisfy this requirement while providing hardware-level protection. Some design considerations are the restart time and impact of the outage; the fact that the more VMs per host, the higher the consolidation ratio; and the possibly longer time to restart along with its larger impact to the business.
