NEW QUESTION: 1What does "A" stand for in the RACI matrix?**A.** actionable**B.** appropriate**C.** achievable**D.** accountable**Answer: D**

NEW QUESTION: 2A user had aggregated the CloudWatch metric data on the AMI ID. The user observed some abnormal behavior of the CPU utilization metric while viewing the last 2 weeks of data. The user wants to share that data with his manager. How can the user achieve this easily with the AWS console?**A.** The user has to find the period and data and provide all the aggregation information to the manager**B.** The user can use the export data option from the CloudWatch console to export the current data point**C.** The user can use the copy URL functionality of CloudWatch to share the exact details**D.** The user can use the CloudWatch data copy functionality to copy the current data points**Answer: C****Explanation:**ExplanationAmazon CloudWatch provides the functionality to graph the metric data generated either by the AWS services or the custom metric to make it easier for the user to analyze. The console provides the option to save the URL or bookmark it so that it can be used in the future by typing the same URL. The Copy URL functionality is available under the console when the user selects any metric to view.

NEW QUESTION: 3A Vmware customer evaluating HCI prefers VSAN. The customer understand that Nutanix is market leader, but believes that VSAN is "good enough" for their needs. What is an example of a question that you should respond in this situation?**A.** What VMs would you run in the public cloud?**B.** What hardware platform would you run Nutanix on given the choice?**C.** What is your IT budget for next year?**D.** Are you interested in reducing your virtualizing licensing

cost? **Answer: D**

NEW QUESTION: 4 How is an EUI-64 format interface ID created from a 48-bit MAC address?
A. by inserting 0xFFFF between the upper three bytes and the lower three bytes of the MAC address
B. by prefixing the MAC address with 0xFF and appending 0xFF to it
C. by prefixing the MAC address with 0xFFEE
D. by prefixing the MAC address with 0xF and inserting 0xF after each of its first three bytes
E. by appending 0xFF to the MAC address
Answer: A
Explanation: The modified EUI-64 format interface identifier is derived from the 48-bit link-layer (MAC) address by inserting the hexadecimal number FFFE between the upper three bytes (OUI field) and the lower three bytes (serial number) of the link layer address.
