NEW QUESTION: 1 Which statement about RBAC user roles on a Cisco Nexus switch is true? **A.** On a Cisco Nexus 7000 Series Switch, roles are shared between VDCs. **B.** Access to a command takes priority over being denied access to a command. **C.** If you belong to multiple roles, you can execute only the commands that are permitted by both roles (logical AND). **D.** The default SAN administrator role restricts configuration to Fibre Channel interfaces. **E.** The predefined roles can only be changed by the network administrator (superuser). **Answer: B** Explanation: If you belong to multiple roles, you can execute a combination of all the commands permitted by these roles. Access to a command takes priority over being denied access to a command. For example, suppose a user has RoleA, which denied access to the configuration commands. However, the users also have RoleB, which has access to the configuration commands. In this case, the users have access to the configuration commands.
