Candidates are looking for valid DCPLA questions which belong to DCPLA urgently, As for the safe environment and effective product, why don't you have a try for our DCPLA test question, never let you down!

NEW QUESTION: 1 A company has an application written using an in-house software framework. The framework installation takes 30 minutes and is performed with a user data script. Company Developers deploy changes to the application frequently. The framework installation is becoming a bottleneck in this process. Which of the following would speed up this process? **A.** Employ a user data script to install the framework but compress the installation files to make them smaller. **B.** Create a pipeline to build a custom AMI with the framework installed and use this AMI as a baseline for application deployments. **C.** Create a pipeline to parallelize the installation tasks and call this pipeline from a user data script. **D.** Configure an AWS OpsWorks cookbook that installs the framework instead of employing user data. Use this cookbook as a base for all deployments. **Answer: B** Explanation: Explanation <https://aws.amazon.com/codepipeline/features/?nc=sn&loc=2>

NEW QUESTION: 2 Which two options are valid server pool policy qualifications? (Choose two.) **A.** Description **B.** Server model **C.** User label **D.** Power group **Answer: B, D**

NEW QUESTION: 3 Which two statements about DHCP are true? (Choose two.) **A.** The DHCP Discover packet has a multicast address of 239.1.1.1. **B.** The DHCP Offer packet is sent from the DHCP server. **C.** DHCP uses TCP port 67. **D.** DHCP uses UDP ports 67 and 68. **E.** DHCP Request is a broadcast message. **Answer: B, D** Explanation: The DHCP employs a connectionless service model, using the User Datagram Protocol (UDP). It is implemented with two UDP port numbers for its operations which are the same as for the BOOTP protocol. UDP port number 67 is the destination port of a server, and UDP port number 68 is used by the client. When a DHCP server receives a DHCPDISCOVER message from a client, which is an IP address lease request, the server reserves an IP address for the client and makes a lease offer by sending a DHCPOFFER message to the client. This message contains the client's MAC address, the IP address that the server is offering, the subnet mask, the lease duration, and the IP address of the DHCP server making the offer.: http://en.wikipedia.org/wiki/Dynamic_Host_Configuration_Protocol
