NEW QUESTION: 4 You have a System Center 2012 R2 Configuration Manager Service Pack 1 (SP1) deployment. All of the client computers in the marketing department are in two device collections named Collection1 and Collection2. Configuration Manager has the client settings configured as shown in the following table. Remote Tools is disabled for all three client settings. You need to enable Remote Tools for the marketing department computers. What should you do? **A.** Enable Remote Tools in Settings1. **B.** Enable Remote Tools in the Default Client Settings. **C.** Create a new client setting that enables Remote Tools. **D.** Enable Remote Tools in Settings2. **Answer: D** Explanation: 1 is the highest priority. When you create a client setting a priority is assigned to it, those with a higher priority win over settings with a lower priority. Note that the default client settings has the priority of 10000, which means you can have 9999 client settings that would have higher priority over the default client settings.
