Up to now, our ROM2 training material has won thousands of people' s support, Our ROM2 study materials are full of useful knowledge, which can meet your requirements of improvement.

**NEW QUESTION: 1** Sie erstellen ein Azure Migrate-Projekt mit dem Namen TestMig in einer Ressourcengruppe mit dem Namen test-migration. Sie müssen ermitteln, welche lokalen virtuellen Maschinen für die Migration bewertet werden sollen. Welche drei Aktionen sollten Sie nacheinander ausführen? Um zu antworten, wählen Sie die entsprechenden Aktionen aus der Liste der Aktionen im Antwortbereich aus und ordnen Sie sie in der richtigen Reihenfolge an.

**Answer:** Explanation: Explanation Step 1: Download the OVA file for the collection appliance Azure Migrate uses an on-premises VM called the collector appliance, to discover information about your on-premises machines. To create the appliance, you download a setup file in Open Virtualization Appliance (.ova) format, and import it as a VM on your on-premises vCenter Server. Step 2: Create a migration group in the project For the purposes of assessment, you gather the discovered VMs into groups. For example, you might group VMs that run the same application. For more precise grouping, you can use dependency visualization to view dependencies of a specific machine, or for all machines in a group and refine the group. Step 3: Create an assessment in the project After a group is defined, you create an assessment for it. References: <https://docs.microsoft.com/en-us/azure/migrate/migrate-overview>

**NEW QUESTION: 2** As soon as you complete the portfolio risk management plan, and you have been working on it now with a team, you realize you need to update some organizational process assets such as: **A.** Risk interview guide **B.** Risk checklists **C.** Risk register **D.** Lessons learned **Answer: B**
