Nowadays, competitions among job-seekers are very fierce, For our H19-402_V1.0 study materials, the high passing rate as 98% to 100% is the best test for quality and efficiency.

If you are not satisfied with our products you can claim for refund, Our Huawei exam dump materials and training online are provided by our experienced IT experts who are specialized in the H19-402_V1.0 passleader dumps and study guide.

Of course, knowledge will accrue to you from our H19-402_V1.0 training guide, Photoexperienceacademy is a package of Huawei HCSP-Presales-Data H19-402_V1.0 Photoexperienceacademy that is prepared by the proficient Photoexperienceacademy experts.

Pass Guaranteed 2024 Huawei Latest H19-402_V1.0: HCSP-Presales-Data Center Network

Planning and Design V1.0 PDF Cram Exam

Let us fight together for a bright future, You will be required to scan a copy of your failed exam Huawei HCSP-Presales-Data H19-402_V1.0 and mail it to us so you are provided access to another certification test immediately.

Get Free Advice for the Certification Exams Our customers' care is [C_C4H47I_34 Reliable Test Sims](#) available 24/7 for all visitors on our pages, Because the greatest advantage of our study materials is the high effectiveness.

Practice Exam: The H19-402_V1.0 practice test software, Our study materials can improve your confidence for real exam and will help you remember the exam questions and answers that you will take part in.

Our H19-402_V1.0 updated study pdf allows you to practice until you think it is ok, There have been 99 percent people used our H19-402_V1.0 exam prep that have passed their exam and get the certification.

Then our PC version of our H19-402_V1.0 exam questions can fully meet their needs only if their computers are equipped with windows system.

NEW QUESTION: 1 Which Cisco router platform supports running either the Cisco IOS or IOS XR operating system?
A. Cisco 12000 GSR **B.** Cisco ISR-G2 **C.** Cisco ASR9k **D.** Cisco ASR1K **E.** Cisco CRS
Answer: A
Explanation: Explanation/Reference: Explanation: The CRS-1 platform natively runs the IOS XR operating system. The c12000 platform, originally being an IOS router, can be upgraded to run IOS XR. However, c12000 hardware, including line cards (LC) as well as route processors (RP), must be checked for XR compliance. TURBOBOOT refers to a fresh boot of the router from ROMMON. TURBOBOOT is required if an IOS router is being converted to IOS XR or as a last resort disaster recovery in the case of CRS-1. If the router is already running an IOS XR image, there is no need to TURBOBOOT the router for an upgrade or downgrade. Later sections in this chapter address the upgrade scenario. This section deals with a fresh boot of the router from ROMMON. A new c12000 platform can be ordered prebaked as an IOS XR router; however, there will always be cases where an IOS running c12000 needs to install IOS XR.

NEW QUESTION: 2 Refer to the exhibit. What is the expected behavior for the following Cisco IOS XR config?
A. The interface will have IPv6 address 10:10::1/64 and IPv6 address 20:20::1/64.
B. The interface will have IPv6 address 20:20::1/64 only.
C. The commit will fail.
D. The interface will have IPv6 address 10:10::1/64 only.
Answer: A

NEW QUESTION: 3 For clientless SSL VPN users, bookmarks can be assigned to their portal. What are three methods for assigning bookmarks? (Choose three.)
A. user policies **B.** XML profiles **C.** LDAP or RADIUS attributes **D.** connection profiles **E.** group policies **F.** the portal customization tool
Answer: A, C, E
Explanation: Create one or more bookmark list entries that specify the URLs of the web-enabled applications eligible for smart tunnel access, then assign the list to the DAPs, group policies, or local user policies for whom you want to provide smart tunnel access. e.g. Dynamic access policies (DAP) VPN gateways operate in dynamic environments. Multiple variables can affect each VPN connection, for example, intranet configurations that frequently change, the various roles each user may inhabit within an organization, and logins from remote access sites with different configurations and levels of security. The task of authorizing users is much more complicated in a VPN environment than it is in a network with a static configuration. Dynamic Access Policies (DAP) on the security appliance let you configure authorization that addresses these many variables. You create a

dynamic access policy by setting a collection of access control attributes that you associate with a specific user tunnel or session. These attributes address issues of multiple group membership and endpoint security. That is, the security appliance grants access to a particular user for a particular session based on the policies you define. It generates a DAP at the time the user connects by selecting and/or aggregating attributes from one or more DAP records. It selects these DAP records based on the endpoint security information of the remote device and the AAA authorization information for the authenticated user. It then applies the DAP record to the user tunnel or session.
