Adds specific types of objects to the directoryRedirects the default container for newly created computers to a specified, target organizational unit (OU) so that newly created computer objects are created in the specific target OU instead of in CN=Computers.You must run the redircmp command from an elevated command prompt.Redircmp.exe is located in the C:WindowsSystem32 folder.You must be a member of the Domain Admins group or the Enterprise Admins group to use this tool.

NEW QUESTION: 3The GREATEST risk posed by an improperly implemented intrusion prevention system (IPS) is:**A.** that there will be too many alerts for system administrators to verify.**B.** the blocking of critical systems or services due to false triggers.**C.** reliance on specialized expertise within the IT organization.**D.** decreased network performance due to IPS

traffic.**Answer: B**Explanation:Explanation/Reference:Explanation:An intrusion prevention system (IPS) prevents a connection or service based on how it is programmed to react to specific incidents. If the packets are coming from a spoofed address and the IPS is triggered based on previously defined behavior, it may block the service or connection of a critical internal system. The other choices are risks that are not as severe as blocking critical systems or services due to false triggers.
